Counseling/Therapy, Psychology, + Psychiatry Referral List

Counselors/Therapists include various types of providers - social workers, licensed clinical therapists, psychologists. These providers can help manage mood disorders, anxiety, and provide behavior strategies for conditions such as ADD or disruptive/oppositional behaviors.

Psychologists generally have a broader scope than Counselors. While some may provide counseling, many do more thorough diagnostic testing and evaluations. This may include ADD testing and learning disability testing.

Psychiatrists are medical doctors. Although some may do therapy, generally, their role is prescribing medications.

For specific needs/conditions, please check out cap4kids.org for many more resources.

We have a counselor in our office, Mary Evans, LISW. She is an NCH Behavioral Health provider who does telehealth appointments and in office appointments. Referrals are made by use to NCH but scheduled by Mary.

Please always check with providers as to the insurances they accept.
